

Perfume

Liquid perfume

You'll need

glass jug

small roll-on glass containers (see our Packaging section)

carrier oil (any one of the following oils, or a combination): almond, jojoba, apricot kernel, camellia, avocado, rosehip, meadowfoam
fragrance oil

Method

In a glass jug, pour in 100g carrier oil. Add a few drops of fragrance oil. When you are happy with the blend, pour into the roll-on containers.

Solid perfume

You'll need

lip balm tubes (20), or 15ml pot (6), or 30ml pot (3)

carrier oil (any one of the following, or a combination): almond, jojoba, apricot kernel, camellia, avocado, rosehip, meadowfoam

beeswax: Any of our beeswaxes will do. White beeswax is nice with avocado oil as the perfume will be green.
fragrance oil

Method

Melt on the stovetop, or in a glass jug in a microwave:

85g carrier oil

15g beeswax

Once it is melted, add the essential oil. Stir to blend.

Pour into your containers.

Note: If you are making a fragrance oil blend, then combine these first. When you are happy with it, add a few drops to your perfume base.
